Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Effective with the August 1946 issue of this report, commodity information is presented in terms of four-digit Schedule A summary commodity classifications, each of which combines the detailed seven-digit classifications having the same first four digits.

NOTE.—NT=No Transactions.

General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

IMPORT GROUP AND SUBGROUP CODE DESIGNATIONS - 1946

Group Code - The first digit in the Schedule A number of each commodity (or the first two digits, in the case of Group 00) indicates the group to which it belongs.

Subgroup Code - Subgroup code designations are shown at the end of each subgroup in the same column with the unit of quantity. Subgroup value and shipping weight totals appear on the line with the subgroup code designations. Reference to the corresponding code designations in the following list will identify the groups and subgroups, which are indicated in the report in code only.

Subgroup Code No.	Schedule A Commodity Code No.	Description
		Group 00 - Animals and Animal Products Edible
1	0010800-0015500	Animals, edible, except for breeding

REPORT No. FT 120

Is divided into the following sections according to geographic areas:

A. North and South America.
B. Europe.
C. Asia, Australia, Oceania, Africa.

Prices for Report No. FT 120 are as follows:

Calendar year 1946	$0.45
Per section	.15

Monthly, beginning with figures for January 1946:

Per issue	.30
Per section	.10
Yearly subscription, including 1946 calendar year annual	3.50
Per section	1.25

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Effective with the August 1946 issue of this report, commodity information is presented in terms of four-digit Schedule A summary commodity classifications, each of which combines the detailed seven-digit classifications having the same first four digits.

NOTE.—NT=No Transactions.

General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

IMPORT GROUP AND SUBGROUP CODE DESIGNATIONS - 1946

Group Code - The first digit in the Schedule A number of each commodity (or the first two digits, in the case of Group 00) indicates the group to which it belongs.

Subgroup Code - Subgroup code designations are shown at the end of each subgroup in the same column with the unit of quantity. Subgroup value and shipping weight totals appear on the line with the subgroup code designations. Reference to the corresponding code designations in the following list will identify the groups and subgroups, which are indicated in the report in code only.

REPORT No. FT 120

Is divided into the following sections according to geographic areas:

A. North and South America.
B. Europe.
C. Asia, Australia, Oceania, Africa.

Prices for Report No. FT 120 are as follows:

Calendar year 1946	$0.45
Per section	.15

Monthly, beginning with figures for January 1946:

Per issue	.30
Per section	.10
Yearly subscription, including 1946 calendar year annual	3.50
Per section	1.25

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions.

Effective with the August 1946 issue of this report, commodity information is presented in terms of four-digit Schedule A summary commodity classifications, each of which combines the detailed seven-digit classifications having the same first four digits.

NOTE.—NT=No Transactions

General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

IMPORT GROUP AND SUBGROUP CODE DESIGNATIONS - 1946

Group Code - The first digit in the Schedule A number of each commodity (or the first two digits, in the case of Group 00) indicates the group to which it belongs.

Subgroup Code - Subgroup code designations are shown at the end of each subgroup in the same column with the unit of quantity. Subgroup value and shipping weight totals appear on the line with the subgroup code designations. Reference to the corresponding code designations in the following list will identify the groups and subgroups, which are indicated in the report in code only.

Subgroup Code No.	Schedule A Commodity Code No.	Description
